WORK EXPERIENCE

MaquilaSAS

Software Architect Engineer

Cali / Remote

May 2026 – Present

- Migrated the company's complete employee and payroll database from Excel to PostgreSQL, designing a structured relational data model to improve data integrity, consistency, and scalability.
- Developed a full-stack employee portal and payroll management system using Tauri, FastAPI, REST APIs, and PostgreSQL, replacing manual spreadsheet-based workflows with centralized, application-driven processes.
- Designed and implemented RESTful APIs with FastAPI to decouple business logic from the client application and provide secure, structured access to employee and payroll data.
- Containerized the application infrastructure using Docker, ensuring reproducible development and deployment environments and simplifying system maintenance.
- Automated and digitized key HR and payroll workflows, centralizing employee records and administrative operations into a single software platform.

SiNNSA

Software Engineer

Bogotá / Remote

Feb 2025 – Present

- Architected and developed the frontend from scratch for SiNNSA using Astro, TypeScript, and Tailwind CSS, establishing the project's UI architecture, component system, and responsive design foundation.
- Integrated Strapi as a headless CMS, consuming structured content through APIs and decoupling content management from the frontend application.
- Designed a component-driven, responsive frontend architecture focused on maintainability, performance, and reusable UI patterns.
- Implemented the complete frontend-to-CMS integration, enabling non-technical users to manage and publish website content without modifying the application code.

EDUCATION

UNAD

Bachelor of Systems Engineering in Engineering

Palmira, Valle del Cauca

Aug 2024 – Present

- **Courses:** Algorithms & Data Structures, Applications in Oracle PSQL, Engineering Data Analysis (Focused)

PROJECTS

CheckDisks

Open Source

Sep 2026 – Sep 2021

- Built a Python-based disk information and monitoring project
- Implemented structured JSON data ingestion
- Used pandas for data normalization and validation
- Designed a data-processing pipeline for disk information
- Published the project on GitHub

Odoo ePOS -> ESC/POS Bridge Windows

Restaurante PQyC

Aug 2025 – Aug 2025

- Built a lightweight HTTP print bridge for Odoo POS ePOS
- Implemented receipt scaling and horizontal centering
- Implemented ePOS XML parsing and raster receipt processing
- Added cash drawer pulse and automatic paper cutting
- Implemented thread-safe RAW printing through the Windows spooler
- Implemented easy setup with installer and auto updater

LICENSES AND CERTIFICATIONS

Data Analysis with Python

Issued by IBM

ID: Z92CR0EYM8EL

May 2026

Python for Data Science

Issued by *Fractal Analytics*

ID: N9HVUSGW10FS

May 2026

Iniciación al desarrollo con IA

Issued by *BIG school*

Sep 2021

Crash Course on Python

Issued by *Google*

ID: 0BWAM3FFV85E

Feb 2026

SKILLS, LANGUAGES, INTERESTS

- **Languages:** Spanish (Native speaker), English (B2), Chinese (Learning)
- **Soft Skills:** Communication, Critical Thinking, Fellowship
- **Programming:** Python, FastAPI, Flask, SQL, PostgreSQL, HTML, Astro, CSS, TailwindCSS, Javascript, TypeScript, ReactJS, NextJS, NodeJS, Typst
- **Tools:** Git, Docker, Typst, Nvim, Linux, Canva
- **BI & Data Analytics:** Microsoft Excel, Microsoft Power BI, Jupyter Notebook, Numpy, Pandas, Plotly, Altair, Matplotlib
- **Interests:** Video Games, Reading, Music, Photography, Philosophy
